INFO

Third-year Information Technology & Management undergraduate at the University of Moratuwa seeking a Software Engineering Internship. Experienced in developing secure, scalable, and user-focused full-stack web and mobile applications using React, React Native, Node.js, Express.js, and MongoDB/SQL. Strong foundation in data structures, algorithms, databases, and clean software architecture.

EDUCATION

University of Moratuwa — Moratuwa, Sri Lanka
B.Sc. (Hons) in Information Technology & Management | 2024–2028 (Expected)
Second Class Upper | CGPA: 3.61 / 4.00

Esoft Metro Campus
Diploma in Information Technology

Kegalle Balika Vidyalyaya
G.C.E. Advanced Level – Physical Science Stream | 2020–2022

SKILLS

Languages	TypeScript, JavaScript, PHP, SQL, Python, C, Java
Frameworks & Libraries	React, React Native (Expo), Node.js, Express.js, Socket.io, WebRTC
Databases & Cloud	MongoDB, MySQL, PostgreSQL, Firebase, Cloudinary
Tools & Platforms	Git, GitHub, Apache, Google Maps API, RESTful APIs

PROJECTS

StrayCare – Mobile App
Technologies: TypeScript, React Native (Expo), Node.js, Express.js, MongoDB, Socket.io, WebRTC, Firebase, Cloudinary, Google Maps API

- Developed a comprehensive mobile application for animal rescue reporting, lost-and-found alerts, pet adoptions, and location-based veterinary and shelter searches.
- Implemented secure authentication, role-based access control, and JWT-based session management.
- Built real-time messaging, forum discussions, WebRTC peer-to-peer calls, and push notifications using Socket.io and Firebase.
- Designed an administrative dashboard for user verification, content moderation, and rescue operation tracking.

GitHub: [TeamTechForge](#)

BlogNet – Multi-User Content Publishing Web Application
Technologies: PHP, MySQL, JavaScript, Apache, Git, Markdown

- Developed a full-stack blogging platform following the Model-View-Controller architecture.
- Implemented secure authentication, role-based permissions, and session handling.
- Built CRUD operations for posts with Markdown formatting, media uploads, categories, tags, and multi-parameter filtering.
- Added threaded comments, likes, bookmarks, author follows, real-time alerts, and an administrative portal.

SpendWise – Personal Finance Web Application
Technologies: TypeScript, React, Node.js, Express.js, PostgreSQL, Prisma ORM, JWT, Tailwind CSS, Recharts, Jest, Supertest

- Developed a full-stack application for managing income, daily expenses, budgets, savings goals, and financial activities.
- Implemented secure authentication, user-specific data access, transaction categorization, budget management, and savings tracking.
- Built interactive dashboards and analytics to visualize spending patterns, financial progress, and personalized financial insights.
- Designed budget alerts, expense filtering, financial reports, and features that support better financial decision-making.

AWARDS

- MoraXtreme 2025 – Competitive Programming & Algorithm Hackathon, University of Moratuwa
- JapuraXtreme 2025 – Inter-University Coding Competition, University of Sri Jayewardenepura
- AI Fundamentals Verification – DataCamp
- Building RESTful APIs with Node.js and Express – LinkedIn Learning

- Express Essentials – Build Powerful Web Apps with Node.js – LinkedIn Learning
- SQL Training – LinkedIn Learning
- Frontend Developer Career Path – Scrimba
- Career Essentials in Data Analysis – Microsoft & LinkedIn Learning
